Hello Qiskit Students -

Thank you for registering for the 2024 Qiskit Global Summer School : The Path to Utility! We are excited for the kickoff event next Monday, July 15th! Head to the Discord to begin introductions and collaborations to prepare - please join us on the server as we begin to get ready!

JOIN THE DISCORD SERVER

Discord will be used for all #QGSS24 communications, updates, study groups, lab work, Q&A, and more - as all ways - it will be the "home base" of the Summer School, whether it's collaborative study group sessions, or just to share the latest and greatest of quantum computing memes.

Once you join the Discord server, all students will need to verify their registration as a student in the *welcome channel* by clicking the **"Click Here to Verify"** button. This will confirm your role as a student. If you're not in the Discord, you're essentially not in the Summer School! Make sure to join today.

Before we get started, you should have a registered IBMid. This will allow you to access the summer school's lab content. Please make sure that the email you registered for the 2024 Qiskit Global Summer School is the same email used for your IBMid. This year, students will be able to run their labs from anywhere, Google Colab, VS Code, qBraid, etc. Attached to this email is a helpful qBraid *how to* but you are welcomed to use a platform of your choosing.

REGISTER YOUR IBMid

The official #QGSS24 Attendee Guide is also attached. It includes the final schedule, information specific to the upcoming content, details about the Discord, the Summer School Code of Conduct, and helpful tips and tricks that will get you prepared (and more hyped!) for Monday! The most updated version of the 2024 Attendee Guide can be downloaded here and the course schedule can be downloaded here.

We look forward to seeing you all in Discord!

Best,

The Qiskit Community Team
